HAB DATA SHEET

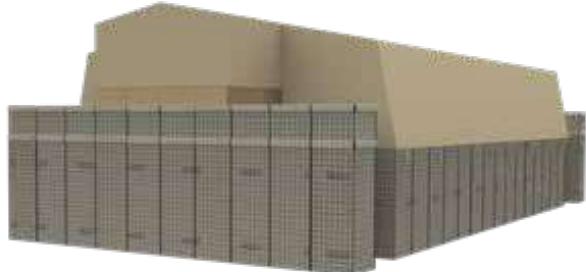

The Hesco Accommodation Bunker (HAB) range provides side and overhead blast and fragmentation protection to keep your personnel or workforce safe.

The HAB range uses our MIL units as walls which provide combat-proven protection. HAB 2 offers enhanced ballistic protection from indirect-fire weapons like mortars and rockets.

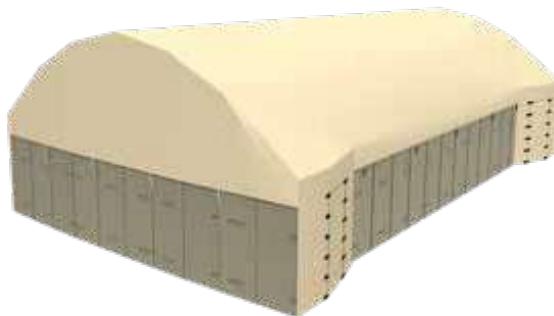

HAB 2 also has a lightweight aluminium roof with a pre-detonation screen.

This means that your personnel are protected from both side and overhead attacks.

Each BUNKER houses up to eight personnel with a personal living space of 2m x 2m per person.

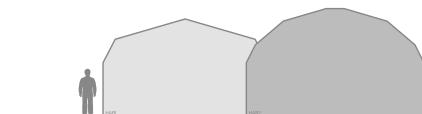

HAB1

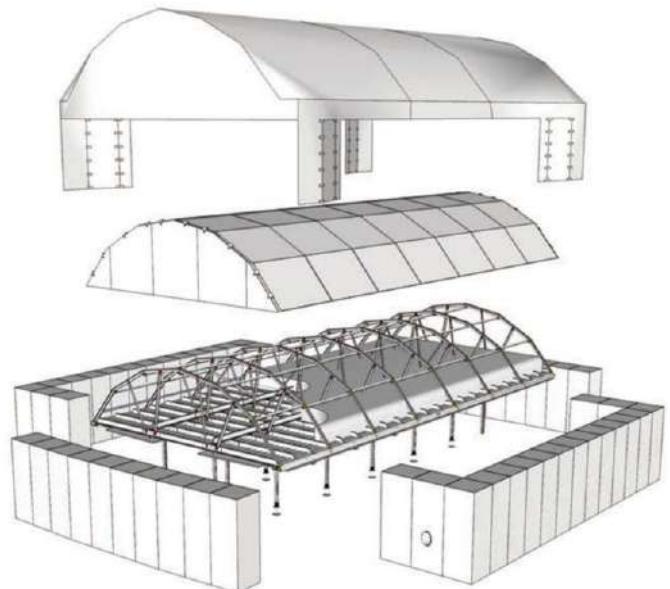

HAB2

HAB 1 can be extended by joining kits end-to-end so you can house all your personnel if you want to.

- HAB 2 also has an end wall service vent so you can install air-conditioning and electricity for comfortable living.
- Easy to construct with limited manpower, simple tools and light earthmoving equipment.
- HAB 2 has an optional cleanable floor to ceiling lining to create a hygienic interior design to be clean, sanitary and easy maintain for medical facilities.
- Comprehensive assembly guides provided.
- Additional construction training available.

GENERAL DIMENSIONS

PRODUCT	Height	Depth	Length
HAB1	3.5	6.2	12.7
HAB2	3.8	6.5	12.8
